

Technical Specification

Document Version: 1.0.2 | Date: 2026

1. Product Overview

XS Plus provides premium architectural expanded metal and perforated mesh solutions. Designed for high-end B2B facade and interior applications, our materials offer a unique blend of structural integrity, solar shading, and aesthetic appeal.

2. Material Specifications

Base Material:	Aluminum Alloy (A1050, A3003, A5052), Galvanized Steel, Mild Steel
Thickness:	1.0mm - 4.0mm (Customizable up to 5.0mm)
SWD (Short Way of Design):	10mm - 100mm
LWD (Long Way of Design):	20mm - 200mm
Strand Width:	2.0mm - 20.0mm
Open Area (%):	25% - 85% (Depending on pattern)
Surface Finish:	Powder Coating (AkzoNobel/Jotun), PVDF, Anodized
Standard Panel Size:	1200x2400mm, 1500x3000mm (Custom sizes available)

3. Installation & Applications

Applications: Exterior Facades, Ceiling Systems, Sun Screens, Balustrades, Interior Partitions.

Installation System: We recommend our proprietary XS-V and XS-U structural frame systems for seamless and secure attachment. Engineering drawings and structural load data must be verified per local building codes.
